21st Century Teaching and Learning: Writing, Creativity, and Self-Expression

The Challenge: Developing Skills That Matter

Writing, creativity, and self-expression are important 21st Century skills for all children. These skills are critical to their future and also to the future of our nation.

Development of these life-long skills must start at the elementary school level. Integrating these essential 21st Century skills into the curriculum is key.

The Solution: “Live Wire” Schools That Power Up 21st Century Skills

The Live Wire Schools program provides educators with the tools needed to transform their classrooms.

Focus: Create an optimal learning environment by reducing stress and improving each learner’s ability to focus.

Write: Help all learners to develop essential writing and self-expression skills, and inspire even the most reluctant writer.

Create: Cultivate imagination and integrate creativity into the curriculum.

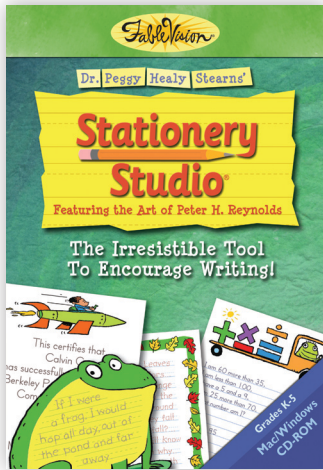

Share: Integrate writing across the curriculum and support technology literacy skills that enable students to “show what they know.”

21st Century Teaching and Learning

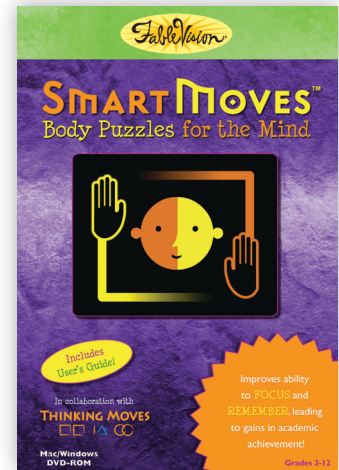

The Live Wire Schools™ Starter Kit includes these award-winning programs:

Stationery Studio®

Animation-ish™

SmartMoves™

Stationery Studio, an award-winning writing tool, includes motivating cross-curricular activities and designs, and supports the writing process at the computer and by hand! An essential tool to get children writing! Designed for K-5 students.

Animation-ish, an easy-to-use animation program, boosts technology literacy, inspires creativity, and enables children to “show what they know.” The cross-curricular activities enable educators to easily integrate creativity in all subjects. When combined with an interactive whiteboard, complex concepts become concrete. Designed for K-12 students.

SmartMoves, an award-winning cognitive fitness program, combines movement and music to create an optimal learning and teaching environment. It reduces stress, improves mood, and increases each learner’s ability to focus. Designed for K-12 students.
