Brightest Stars
By PETER H. REYNOLDS

Teachers are among
the brightest stars in our constellation.

They guide us,
Inspire us.

They light the way,
They help us see patterns in the stars.

They are there even when the clouds roll in,
Teachers are around us, their spirit surrounds us,
twenty four hours a day.

They help us find true North.

They help us navigate our way
to our true potential.

They are stars.

They are among the brightest stars
in our constellation.
